

Subject	Consultant Agreement Amendments (various projects)
Summary	Over the years, the Authority has contracted with various consulting firms to perform engineering services for projects. While some agreements have previously been amended to increase the total agreement value or to extend the term of the agreement, there are a number of agreements which are currently active and are either approaching or have passed their expiration dates. Staff has identified the agreements and seeks to extend them to allow for completion of tasks.
Recommendations	Authorize the Chair to execute eight separate Amendments to extend the term of the Consultant Agreements.
Financial Implications	None.
