

Electronic Bicycle Facilities at Concord, North Concord, Walnut Creek and Pleasant Hill BART Stations

Project Number

10001-04

Project Sponsor

Bay Area Rapid Transit District (BART)

Project Type

- Transit
- Highway
- Local Streets
- Major Arterial
- Bike/Pedestrian
- Other

Project Scope

This project is for purchase and installation of electronic bicycle facilities (e.g. e-lockers, smart card cages and bicycle stations) to increase bicycle storage capacity to accommodate the existing and future bicycle parking demand at the Concord, North Concord, Walnut Creek, and Pleasant Hill BART Stations. To accommodate unmet demand plus projected growth in demand to the year 2015 for secure bicycle storage, this project will install a minimum of 196 secure bicycle parking spaces. Design of the bicycle parking area will include signage and other enhancements to create an inviting and functional bicycle parking area.

Electronic Bicycle Lockers at Concord, North Concord and Pleasant Hill BART Stations *(cont.)*

Need/Purpose

The project goal is to increase bicycling to transit by providing convenient, secure bicycle parking throughout the BART service area. The directives of the BART Strategic Plan call for a shift away from the parked single occupant vehicle to other modes. The 196 secure bicycle parking spaces will provide needed capacity for the projected demand by the year 2015.

Possible Segmentation

Improvements can be phased by station.

Issues

None.

Current Status

BART has engaged the contractor and production of electronic lockers has begun. Installation of lockers will begin in fall 2011.
