

# Improved Vertical Circulation at El Cerrito Plaza BART Station

## Project Number

10002-02

## Project Sponsor

Bay Area Rapid Transit District (BART)

## Project Type

-  Transit
- Highway
- Local Streets
- Major Arterial
-  Bike/Pedestrian
- Other

## Project Scope

The El Cerrito Plaza BART Station is a two-sided elevated platform station with constrained vertical circulation. This project will improve vertical circulation between concourse and platform levels by modifying stairs, elevators, and/or escalators.

## Funding Sources (\$ in million)

<b>Total</b>	<b>3.8</b>
Measure J Transportation Sales Tax <sup>1</sup>	3.8

<sup>1</sup>Measure J funds shown in escalated dollars. Actual commitment is in 2004 dollars as shown in Appendix A.

## Improved Vertical Circulation at El Cerrito Plaza BART Station (cont.)

### Need/Purpose

Growth in ridership has resulted in station passenger traffic at the capacity design limit of the current station structure.

### Possible Segmentation

N/A

### Issues

None.

### Current Status

Project in planning stages.
