

PACHECO BOULEVARD WIDENING

**PROPONENT:
CONTRA COSTA COUNTY**

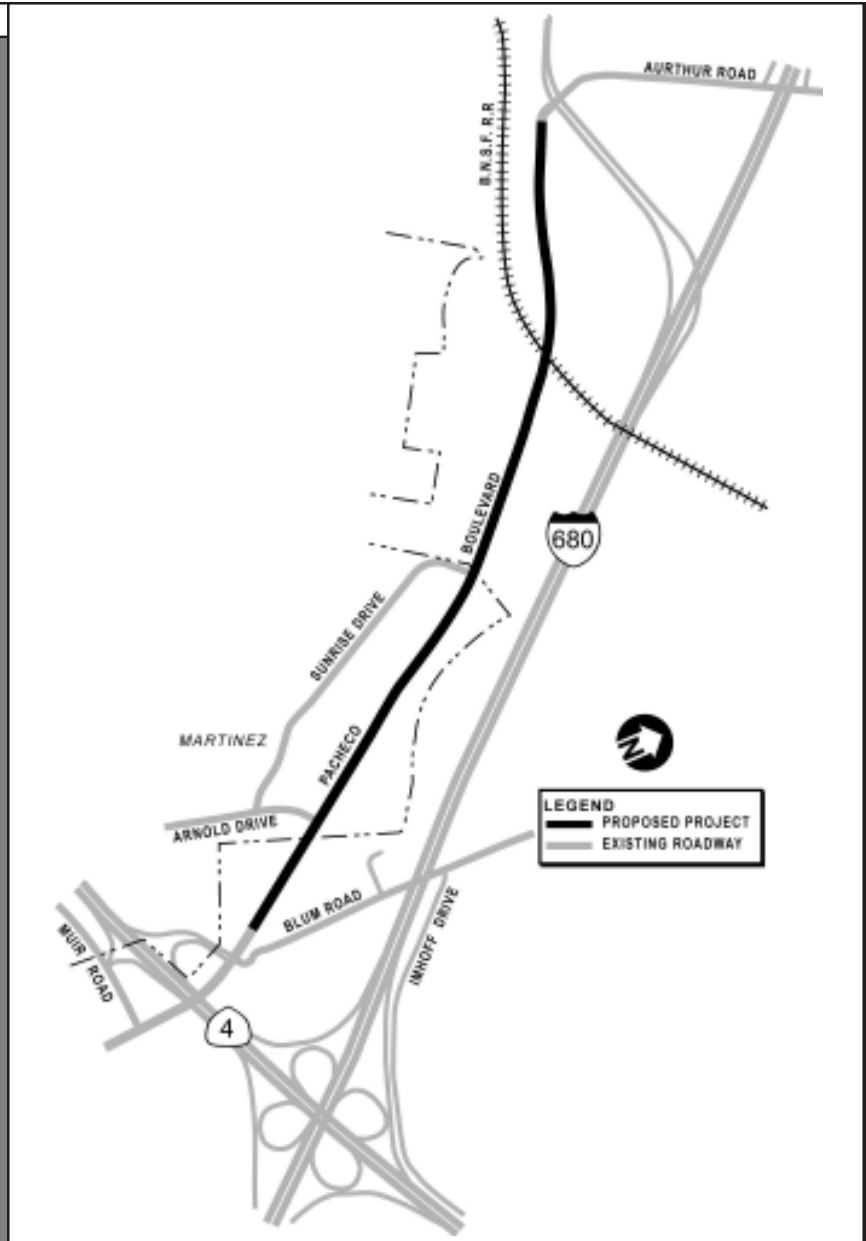

**PROJECT NO:
1216**

DESCRIPTION:

This project consists of widening Pacheco Boulevard between Blum Road and Arthur Road in the Martinez area. The road serves as a local road and a parallel route to Interstate 680. The closure of Solano Way has left Pacheco Boulevard as the main north/south connector in the area other than Interstate 680.

STATUS:

The project consists of several phases and is in the planning stage. It is anticipated that the project planning and the environmental documents for all the phases will be completed in fiscal year 2006. The County has had discussions with the railroad to coordinate the relocation of the railroad overcrossing. The project development and the environmental documents for relocating the overcrossing and realigning the road near the railroad have been completed. The County is planning to coordinate the railroad work with the Interstate 680/State Route 4 Interchange reconstruction project. Project phases will be completed as funding becomes available.

FUNDING SOURCES (\$ X 1000):

Measure C (Esc. \$) ¹	3,070.0
Tosco Transportation Mitigation Fund	4,000.0
Developer Fees/Local	1,500.0
Unfunded (to be determined)	<u>6,370.4</u>
TOTAL	\$ 14,940.4

¹ Measure C funds shown in escalated dollars. Actual commitment is in 1988 dollars as shown in Appendix A.
