

Appendix B CEQA Checklist

Appendix B CEQA Environmental Checklist

The following CEQA Environmental Checklist identifies physical, biological, social and economic factors that might be affected by the proposed project. The CEQA impact levels include potentially significant impact, less than significant impact with mitigation, less than significant impact, and no impact. Please refer to the following for detailed discussions regarding impacts under CEQA:

- Guidance: Title 14, Chapter 3, California Code of Regulations, Sections 15000 et seq.
- Statutes: Division 13, California Public Resource Code, Sections 21000-21178.1

In many cases, background studies performed in connection with the project indicate no impacts. A “no impact” reflects this determination. Any needed discussion is included in the section following the checklist.

The words “significant” and “significance” used throughout the checklist are related to CEQA, not NEPA, impacts (unless otherwise noted). CEQA requires that environmental documents determine significant or potentially significant impacts, NEPA does not. Addressing significant or potentially significant impacts in joint CEQA and NEPA environmental documents can be confusing, especially in those instances where the two laws and implementing regulations have different thresholds of significance. Under NEPA, the degree of impact to a resource is used only to determine which NEPA document is necessary. Once the federal agency has determined the magnitude of a project's impacts and the level of documentation required, it is the magnitude of the impact that is evaluated in the environmental document, not the degree of significance. For the purpose of the impact discussion in this document, determination of significant or potentially significant impacts is made only in the context of CEQA.
