ISSUED BY:

CONTRA COSTA
transportation
authority

Martinez, CA – The Contra Costa Transportation Authority (CCTA) and the California Department of Transportation (Caltrans) are constructing the first phase of a multi-phased project to improve safety and help reduce congestion at the Interstate-680/State Route 4 Interchange in central Contra Costa County. In order to facilitate the setting of overhead girders and ensure crew and public safety during this operation, temporary nighttime closures of Pacheco Boulevard in both directions will occur for approximately four consecutive nights, Tuesday, July 30th through Friday, August 2nd from 10:00 p.m. until 5:00 a.m. This work has been scheduled during nighttime hours to minimize impacts to commute-hour traffic.

Planned closures include:

Tuesday, July 30 through Friday, August 2, 2019

10:00 p.m. – 5:00 a.m.

Both Directions of Pacheco Boulevard in Martinez

Please see closure and detour map below.

**Pacheco Blvd Nighttime Closures: Tuesday, July 30 through Friday, August 2, 2019
10:00 p.m. to 5:00 a.m.**

Motorists are advised to be alert for on-site closure and detour signs, and to Slow for the Cone Zone. Please drive with caution through the detours and leave a safe traveling distance between your vehicle and vehicle ahead of you.

About the Interstate 680/State Route 4 Interchange Improvement Project

The Interstate 680/State Route 4 Interchange Improvement Project will widen approximately four miles of State Route 4 in both directions between Morello Avenue in Martinez and State Route 242 by adding a third lane in the eastbound and westbound directions to improve on-ramp and off-ramp merging. The project also includes widening of five structures, extending eastbound State Route 4's carpool lane approximately two miles, installation of safety lighting, and replacement of the Grayson Creek Bridge to bring it up to current State bridge safety codes. This segment of work in this multi-phased project will lay the groundwork for future improvements to connector ramps, improve traffic safety and enhance traffic flow.
